

ABSTRACT OF THE DISCLOSURE

Please amend the Abstract as follows:

In a shaver [[1]] having provided on an upper end portion of a main body [[2]] thereof a head portion [[3]] comprising a razor [[6]] having an outer blade [[4]] and an inner blade [[5]], a front cross section of the shaver [[1]] has a shape narrowed at a substantially center portion in its up and down direction, and a side cross section of the shaver [[1]] has a substantially S-shape, in order to increase the contact area between the main body [[2]] and the palm, to improve fit feeling, to make it hard to slip, and to finely adjust the angle of the razor against the skin without moving the wrist.
